400 → 1,500+
customers served by the Cloud operation, with the same team

R$ 1M+
in avoided costs by bringing ERP migration and infrastructure in-house

18 years
in technology, 10+ leading systems and development teams

First
public AI model specialized in ADVPL on Hugging Face

Profile

Technology leader with 18 years in the field and more than 15 dedicated to the TOTVS Protheus ecosystem, Latin America's leading ERP. I built my career from the inside out: I started as an ADVPL analyst and developer and today lead technical teams and critical operations. I know Protheus from both the business and the technology side, from architecture, migrations and integrations to redesigning finance, tax, procurement, manufacturing and HR processes. My hallmark is building autonomous, high-performing teams. At TOTVS, Brazil's largest software company, I run a Cloud operation that grew from 400 to more than 1,500 customers with the same team, driven by automation and everyday use of AI.

Core competencies

Strategy, budget and governance
Roadmap, prioritization, feasibility and risk, technology budget, reporting to the board, IT governance and information security

Team leadership
Developing analysts and engineers, mentoring, career plans, performance reviews, OKRs, Scrum and Kanban

Operations and results
SLA and MTTR, capacity management, operating cost, customer retention (churn), crisis management

TOTVS Protheus ERP
Architecture, administration, 10+ release migrations, ADVPL/TLPP, APIs, SQL; finance, tax, accounting, procurement, costing, PP&C and HR

Applied AI and automation
LLMs, fine-tuning, local AI, agents, operations automation and AI adoption across teams

Development and integration
C#, Node.js, TypeScript, React, React Native, Flutter, SQL Server, Docker, Kubernetes, BI, Fluig

Professional experience

Cloud Operations Coordinator

Dec 2022 – present

TOTVS S/A · Brazil's largest software company

- Cloud operation for the TOTVS Fluig and TOTVS Agro product lines, accountable for team, KPIs, operational efficiency and customer experience.
- **Efficient scale:** customer base grew from 400 to more than 1,500 with no increase in headcount, with automation and AI built into the team's routine.
- **Service levels:** critical environments consistently meeting SLA and MTTR targets, backed by risk management and prevention.
- **Retention:** hands-on churn reduction, with win-back plans and dedicated service for strategic accounts.
- **Projects:** built the Cloud offering for the TOTVS Agro ERP, migrated on-premises customers to Cloud and across edges, and moved PaaS environments to Docker and Kubernetes.
- **People:** more than 10 professionals developed over my career into technical leads, with promotions from analyst to specialist.

Technology and Development Coordinator

Dec 2021 – Dec 2022

Cinbal, Incoflandres Group · the Americas' largest flat-steel lithography and processing company · reporting to the Executive Management

- **More than R$ 1 million in avoided costs:** ERP migration, server fleet, monitoring, telephony and disaster recovery delivered by the in-house team, with no outside consultancy.
- Managed the technology budget and ran risk and feasibility analysis for investment decisions.
- Evolved Protheus: new modules, ADVPL customizations, integrations and SQL Server operations.

Technology and Innovation Manager

Apr 2019 – Dec 2021

BMB Mode Center and BMB Tech · MAN / Volkswagen Trucks and Buses ecosystem · reporting directly to the Board

From specialist to manager in under 18 months: **Senior Specialist** (2019) · **IT Coordinator** (2020) · **Head of Technology and Innovation, BMB Tech** (2020–2021) · **Technology and Innovation Manager** (2020–2021)

- Set the technology and innovation roadmap and managed the department budget.
- ERP migration and infrastructure overhaul delivered by the in-house team, with no outside consultancy.
- Web and mobile KPI platform for production, billing and expenses integrated with the ERP, with dashboards for the Board.
- Projects: ROTA (real-time production tracking integrated with the ERP), budget planning and control with dashboards and machine learning, purchase approval workflows, inventory, costing and PP&C redesign.

Senior Systems Analyst

Nov 2016 – Apr 2019

Fundação CSN

- First leadership role: responsible for the systems and development area, leading the team technically and prioritizing demand.
- Ran Protheus across finance, tax, procurement, manufacturing and HR; migrated Protheus 11 to 12 and SQL Server 2000 to 2016.
- Implemented TOTVS RM Educational and ADP payroll; built the Supplier Portal integrated with the ERP.

Early career

2008 – 2016

- **Development Analyst, Grupo Toniato** (2014–2016, logistics): implemented TOTVS Logix (WMS and TMS) and Protheus integrations in C#, Razor and SQL.
- **IT Assistant, ORMEC Engenharia** (2011–2014): Protheus implementation, support and customization.
- **Instructor, Prepara** (2010–2011) · **Intern, CSN** (2008).

AI initiatives and own products

- **ADVPL AI** (huggingface.co/dyulianocecilio): the first public AI model specialized in ADVPL/TLPP, trained on more than 150,000 examples of development, database and business rules. Runs locally and is open to the community.
- **SinergIA:** management platform for multidisciplinary teams working remotely or hybrid.
- **Executive management systems:** management apps for executives published on the App Store and Google Play.

Education and certifications
